

Atlas of the Brains of Domestic Animals

This is the most complete and detailed atlas of the brains of domestic animals yet published in any language. With separate sections on the cow, horse, pig, sheep, goat, and chicken, this atlas will be one of the greatest value to all who deal in morphology. Professor Yoshikawa has reproduced by means of a special and ingenious method the carefully chosen histological slides of the brain sections with the utmost faithfulness. The exhaustive anatomical nomenclature is printed in a second color directly on the plates for ease in reference. A complete bibliography is included.
