

## Heat And Mass Transfer

Heat and Mass Transfer is a compulsory subject for mechanical, chemical, production, aeronautical and metallurgical engineering students. Therefore the contents have been designed to meet the requirements of all these disciplines and the book will prove to be an excellent university level textbook. The salient features are:- 1. The physical concepts have been presented as answers to frequently asked review questions in a simple, systematic and lucid manner 2. 292 worked out examples illustrate the physical concepts and their applications 3. 220 multiple choice questions with answers 4. More than 150 questions with answers for practice 5. Aerodynamic heating, frost bite, heat pipes and mass transfer problems discussed in detail Also available: Material Science and Engineering - ISBN 1905740514 Specialty Polymers: Materials And Applications - ISBN 1904798950 Anshan Publishers is a publisher of fine medical, scientific, and technical books. We find the best titles from our worldwide publishing partners and bring them to the global marketplace. We publish in a wide range of fields, including:- Biological Sciences Biotechnology Chemistry Engineering Material Science Microbiology Pure and Applied Physics Pure and Applied Mathematics Statistics
