

Plasma Processing of Semiconductors contains 28 contributions from 18 experts and covers plasma etching, plasma deposition, plasma-surface interactions, numerical modelling, plasma diagnostics, less conventional processing applications of plasmas, and industrial applications. Audience: Coverage ranges from introductory to state of the art, thus the book is suitable for graduate-level students seeking an introduction to the field as well as established workers wishing to broaden or update their knowledge.

THE VICAR OF WAKEFIELD (Everymans Library), The Modern Egyptian Dialect of Arabic: A Grammar with Exercises, Reading Lessons and Glossaries, A+ Guide to the Freshman Five: Boxed Set (A+ Guides to Writing Book 7), Insight Travel Maps: Canada, Version Originale: Livre De LEleve + CD + DVD 2 (A2) (French Edition), An assessment of factors affecting the development and promotion of micro and small enterprises (German Edition),
