

## The Hybrid Diaries: (On electric Wheels)

This is the story of invention. The worlds first Human electric solar and air powered hybrid vehicle that I designed and built for the 1991 International Energy Challenge in Australia. The story is laid out in a diary format. And covers almost an entire year. The book is filled with exciting events that took place during the development period. There are many twists and turns covering the technology that I developed in 1990. There is plenty of excitement, laughter and tears. Plus, a whole lot of good cooking tips. This is a fictionalized story based on true events
